YUNFA PRECISION DEVELOPMENT CO., LTD.

01

Company Background

Core Business: Mold design & development, Metal forming manufacturing, Customer appearance process
About Yunfa: Experience-Over 30 years expertise, Service-Manufacture integrated service, Quality-Top tier customer acceptance

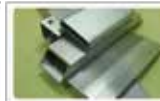

Product Line

Metal stamping appearance, Metal deep drawing, Aluminum extrusion, Metal surface treatment, Assembly

Website

TAIHAN PRECISION TECHNOLOGY CO., LTD.

02

Company Background

TaiHan Precision Technology Corporation was founded in 1987. In the beginning stage, we mainly focused on precision mold design and manufacture. We had already been awarded both ISO9001 and ISO14001 certifications. We provide product and service of mold, plastic injection, surface treatment and assembling, key customers are major Japanese brand name and Taiwanese-Capital-based system integrators. Through them, our variety products had been delivered worldwide for years.

Product Line

Mold Design and Manufacturing, Plastic Injection, Surface Treatment (Painting, NCVM and IMD) and Assembly(Assembly/Installation, Welding)

JOUNING BLOWER CO., LTD.

03

Company Background

Jouning Blower Co., Ltd. was established in 1968. We have produced various blowers, specialized in blades, fan wheels & industrial fans. Our excellent products have been sold to the domestic market in Taiwan and all over the world such as Japan, Southeastern Asia, Middle East, Australia, America & European countries where we have good reputation for high good quality products. Now we will keep unceasingly developing new turbo fan fan, jet flow air mover, with our outstanding technology & cooperative attitude, we offer best design & excellent service for our clients.

Product Line

Sirocco Fan Series, Turbo Fan CH, New UFO Fan

CREATE SPRINT TECHNICAL CONSULTANT LTD.

04

Company Background

CST is a professional team of many R & D productions in pursuit of both efficiency and quality. The “Delta BOT V101 3D Printer”, “Magic Chopsticks Film” and other leading products are manufactured with a great number of patent certificates.

Product Line

CST provides customers surface design, mechanical design, forward and reverse engineering services, model prototyping (metal, plastic, sheet metal), design and production of jigs (fixture), design and production of automated equipment, plastic mold making and production, and production of sheet metal mold tools. An integration service from top to bottom is provided for manufacture industry continuous production.

ENDEAVOR PLASTICS CORP.

05

Company Background

ENDEAVOR is mainly engaged in mold design and production, and all kinds of plastics products. 1, Expertise in precise mold fabricated.2,Plastic products manufacture.3,Metal injection molding.4, Product Assembly.

Product Line

- Component for fuse
- SMD-LED leading wire framework & insert molding plastics
- Mouse laser plastics component
- Medical products
- precise connector
- All kinds of plastics for 3C property products
- Provide total service of plastics injection molding, for example mold design(2D&3D), CAM, runner analysis, CNC processing, EDN processing, benchwork assembly, and components measurement by precision equipment.

REAL LOCKS & SECURITY CO., LTD.

06

Company Background

REAL LOCKS & SECURITY CO., LTD. is a professional lock designing and manufacturing company, which was established in 1972.The unique and high safety detained disc cylinder used in REAL LOCKS system provides 300 million of different key combinations, and the master key system can fit most applications and satisfy customers' requirements world-wide. REAL key combination can make 300 millions of key differences. Also it can make master key system, key different, key alike and re-keying.

Product Line

Main Product: Keyless Locks, Cam Locks, Bike Locks, Cargo locks, Vending Machine locks.

Sub category: Key System Lock Cylinder, Pad Lock, Cabinet Lock, Bike/Motorcycle Lock, Vehicle Lock, Cable Lock, Window & Door Device, Hardware & Other Parts, OEM/ODM Products

LI YE MACHINERY CO.,LTD..

07

Company Background

Over the past years, Li-Ye insists on producing high speed presses with reliable quality. Our high speed presses are widely adapted in manufacturing computer connectors, mobile phones, electronic and automobile devices industries. Our branch office has been expanded to China India, Southern Asia, Eastern Europe, and new development countries.

Product Line

MF Series and MT Series

- ◆ High tensile cast iron stress relieved for maximum rigidity and long time accuracy.
- ◆ Opposite side load dynamic counter balance device can wipe out the noise and vibration to keep balance for press in high speed running operation.
- ◆ Motor for die height adjustment device and digital display die height indicator.
- ◆ It is designed for the operators convenience with computer control system, brake and error correction display and screen.

YEE HAUR TECHNOLOGY CO., LTD.

08

Company Background

Since 1974, the company YEE HAUR has been developing and producing industrial heating elements. The company is located in New Taipei City, Shulin Dist. We have forty years experience and research in production of HIGH WATT DENSITY CARTRIDGE HEATER. Today we manufacture heating elements for hundreds of applications in thousands of design variations.

Product Line

Some of our products were original developments in the industry, for YEE HAUR hold patents. Our products are sold nationally and internationally through a network.

HI HEAT FURNACE INDUSTRIAL CO. LTD.

09

Company Background

HI HEAT FURNACE INDUSTRIAL CO was established since from 1977, is specially in making the INDUSTRIAL HEAT-TREATMENT FURNAC and GLASS FORMING/BENDING EQUIPMENT. Moreover we got the ISO-9001 certification.

Product Line

1. Continuous bright carburizing & hardening furnace
2. Batch type carburizing & Nitriding furnace
3. Continuous bright heat treatment furnace
4. Circulation type furnace
5. High temperature furnace
6. RX, DX, AX gas generator
7. Powder metallurgy sinter furnace
8. Salt bath treatment furnace
9. Aluminum & low alloy melting furnace Aluminum Brazing furnace for al. condenser & heat exchange.
10. Teflon & enamel coating furnace.
11. Back- Mirror forming furnace for auto car.
12. Flat Glass Temper/Bending Furnace (nature, chemical...).

MANAGA MAGNET MANUFACTURE FACTORY

11

Company Background

MAGANA MAGNET SEPARATORS MANUFACTURER CO., LTD, has established since 1968 in Taipei, Taiwan. We are a specialized manufacturer that produces a wide range of magnetic separation equipment and devices for all industries.

We are specialized in offering NdFeb Powerful Magnets to global client with superior design and outstanding engineering combine to offer some of the most respected magnetic products on the market.

Our products have been used by countries (Japan, Australia, Southeast Asia... etc.) And in a wide variety of industries, such as ECO Recycling Industries, (Glass, Wood, Paper, Plastic, Tires...etc.), Mining quarries industries, Chemical Industries and Food Industries, etc.

Product Line

(A) SELF-CLEANING MAGNET SEPARATORS (Pat.No.452010):- (1) BOX- HOUSING. BASE-FRAME.USING #304-STAINLESS STEEL. (2) NdFeB POWERFUL MAGNETS. (3) SURFACE GAUSS 3600GS.

(B) BAUTOMATIC DRUM MAGNET SEPARATORS (Pat.No.465383):- (1)DRUM CASE#SHAFT ROLLER USING #304 STAINLESS STEEL. (2)NdFeB POWERFUL MAGNETS. (3)SURFACE GAUSS 3500GS.

LEN GIN STEEL CO., LTD.

12

Company Background

The Universal Angle Steel manufactured by us has been selling in both domestic and overseas markets for 23 years. We started with the wholesaling of single item universal angle steel since 1989 and developed to ODM of warehousing material rack and removable storage cabinets. Under the drive to breakthrough, we have secured the distributorship of Angle Steel Connector, invented by Chang Jing International Crop, which won international patent. This patented products enables consumers to enjoy free shaping from the conventional cubic and fixed structure.

Product Line

Angle Steel Connector (Universal joint)

1. Featured with the functions of universal angle steel plus extra load capacity
2. Fabricating mechanisms of different forms and functions in substituting welded angle steel
3. Suitable for DIY, easy in assembly and disassemble, the material rack can be dismantled and removed rapidly and the structure can be changed, widened or extended easily at wish.

GEOMATRIX CO., LTD.

13

Company Background

Geomatrix was established in 2001, we always maintained the Integrity, Quality, Professional for CNC milling machine to make metal parts development and production, and a small amount of production, but also to accept the metal and plastic model making. We have certificate(AFNOR) ISO 9001 verification in 2011, we guarantee the best quality to our customers. On each project to adopt the professional division, Data confirmed → CAD/CAM design → CNC machining → Painting and Assembly → Quality inspection, expect to help customers quickly successfully develop products, in order to increase their competitiveness in their market.

Product Line

Metal components development, Metal / Plastic working models, Small amount of metal parts production, Rapid tooling, Simple mold, Transport models, Injection mold, Reverse engineering, laser engraving, special surface treatment etc..

LONGNEW PLASTIC STEEL MOLD CO.,LTD.

14

Company Background

Long New Group consists of two companies namely Long New Plastic Steel Mold Co. LTD. and Long New Technology & Research Co LTD.. Since 1984, Long New Plastic Steel Mold Co. LTD. has been producing high quality molds and plastic injection molding operations throughout Asia, Europe and America. In 2001, Long New Plastic Steel Mold Co. LTD. established Long New Technology & Research Co. LTD., to provide quality printing packaging products.

Product Line

Plastic product: car accessories, monitoring system, Electrical and Electronic product, home appliances, medical supplies, etc.

Fasi Automation Co., LTD.

15

Company Background

Established in the year of 2009, Fasi Automation has been focusing on supplying the best drive, control and information technology projects. We cooperate with machinery makers to research and sales of control systems and provide the best solution for customers, our divisions in Guang Dong and Shanghai perform increasing sales achievement. We hope to expand our business to South Eastern Asia and look for purchasers with whom we can establish long-term cooperation.

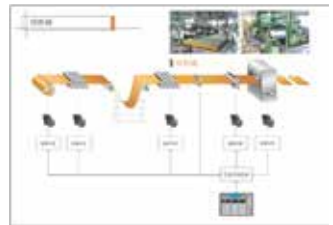

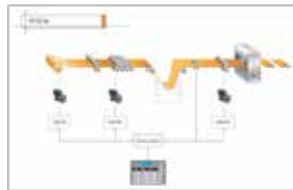

Product Line

AC/DC Motors & Control, ServoMotor Controller, inverter Control, PLC control, Decentralized Digital Control, Design control system for whole Plant, Explosion Proof Motor, System Integration and others.

SHIANG-HAN STEEL ALUMINUM INC.

16

Company Background

Shiang-Han Steel Aluminum Inc. is one of the renowned manufacturers, suppliers and exporters of Iron Doors and aluminum window, with a factory in Taiwan. With years of experience in the line of making, we are known for our outstanding performance in the industry. We have helped ourselves as one of the leading brand in Taiwan. We constantly upgrade our products to meet the international standards. We hold a team of professionals, which provides on time deliveries with high quality.

Product Line

Steel entry door, Fire Exit doors. Embossed doors, Louvre doors, ventilation doors, aluminums windows.

YUNG HSIEN MACHINERY CO., LTD.

17

Company Background

Yung Hsien Machinery Co., Ltd. is a reputable professional recycling machinery manufacturer in Taiwan. Production of CD/VCD/CD-R recovery EPO/EPP/EPS/EPE recycling machinery and equipment. More than 20 years, we dedicated to designing, manufacturing and exporting our machines to the world, and won the 2005 Economic Affairs ' Industrial Development Bureau issued excellent Taiwan manufacture environmentally friendly products award winners.

Over the years, we are continuing to develop new models. In addition to the CE certification, we won the excellent Manufacturers Association of the Republic issued "Taiwan fine products gold medal" and "Taiwan made the Golden helm Award" ... Many patent certificates.

Our machines are smoke-free, odorless, complete waste recycling could create more interest. Our machines are also suitable for fish markets, electronics factories and recycling ... And many other places.

Product Line

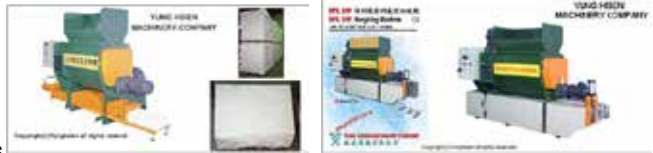

EPS, EPP, EPO Recycling Machine, Crusher and etc.

CHINA ELECTRODE AND MACHINERY CO.,LTD.

18

Company Background

CEMC is the first manufacturer and supplier of welding electrodes in Taiwan.

CEMC was established in 1955 and is a qualified company which owns superior QC team and Management System.

We committed to improve all our products.

Our quality control is second to none in this field, and our welding electrodes come highly recommended by leading construction companies in Taiwan.

Product Line

Stainless Steel Arc Welding Electrodes, Cast Iron Arc Welding Electrodes, Hard Surfacing Arc Welding Electrodes, High Tensile Steel Arc Welding Electrodes, Mild Steel Arc Welding Electrodes, Gouging Purpose Arc Welding Electrodes and etc.

Taiwan Resibon Abrasive Products Co., LTD.

19

Company Background

Taiwan Resibon Abrasive Products Co., Ltd., TAILIN today employs more than 500 people in several factories and sales subsidiaries and is being distributed in more 50 countries. Quality, Environmental protection, and Safety are integral part of our group's processes. Tailin's ISO 9001, ISO14001, and OSA certifications attest to our adherence to international standards.

Product Line

Grinding/Cutting Wheels (Type 1/ Type 27), Type 27 Flexible Grinding Wheels, Non-woven polishing wheels, Floor pads, Cut-Net wheels, Sanding disc paper, Type 27 & 29 Flap Disc, Mounted points, Phenolic resin, Coated abrasives etc. For customized design and manufacturing

TAILIDA TRADE CO., LTD.

20

Company Background

Founded in 1993, our company is the main agent of foreign well-known manufacturers transmission parts and each foreign factories as well as the domestic manufacturer jointly developed high-tech components, creating domestic manufacturers product upgrades more space. Our company is actively promoting the 3D PRINTER, the transmission components, and Mechatronics.

Product Line

1. Self-Lubricating Bearing and Self-Lubricating Wear Plate.
2. Linear Bearing
3. Linear Rail and Block.
4. Ball Screw and Nut.
5. 3D Printer(FDM, DLP).
6. Modular Linear Actuators.
7. Frequency Converter.
8. Shaft and Shaft Supporting Sear.
9. Universal Joint.
10. Coupling.
11. Ball Bearings, Needle Bearings, Bearing Units and Rod End with Spherical Plain Bearing.
12. LED, LVD

Company Background

Founded in 1985, FongKai Business Group had transmitted from a manufacturing-based to a computer chassis conglomerates. We had been forming a covering hardware industry, the electronics manufacturing industry, mold R & D manufacturing, plastics manufacturing R & D, packaging paper industry and high-tech medical products research and development and manufacturing of diversified industrial structure, and formed in order to occupy a certain hardware industry leading technology dominance and high-tech enterprise group.

Product Line

Design and manufacture of computer peripherals, large home appliances, auto parts and other precision metal molds, with a single engineering mode, delivery mode, continuous mode, and other professional mold technology. The host computer and network server shell casing stamping, production, assembly, painting, processing, packaging, processing and manufacturing of optoelectronic components and appliances parts, LED lights, whole brain development training machine, beauty equipment and other customer-specific requirements .

Company Background

A 30 Years Expert in Full-Set Surface Treatment Equipment/Design + Manufacture + Consultant/Yui-Tai Enterprise Co., Ltd was established in 1979 and specialized in all kinds of electroplating equipment and waste water & gas treatment equipment. With over 30 years experiences in this field, we are always with an eye to serving our customers needs in the most cost effective ways as possible. We are a sole agent of Japanese Superior Etching equipment. We are not only upgrade our skill for the manufacturing of PCB/PWB Vacuum Etching Technology but also familiar with some famous chemical suppliers. Our customers are including the manufacturers of Fastener, Zipper, Anodize, Passive Element, Connector, LED, PCB and various metal parts/ components. All proceeding is special designed to fulfill the requirements from our customers.

Product Line

1. Electroplating equipments - Single-armed type: Suspend type, Rotary type, Manual Equipment
2. Various barrels - SMD type: Double barrel, the partiality type rolls the bucket, Customized
3. Experimentation - Rack plating
4. Auxiliary - PLC System: Refrigerator, Filter, Medicine feeder, Dewatering Machine
5. Environmental - Air exhaust: Waste water treatment, Waste gas treatment, Pure water treatment
6. Vairous tanks - PP tanks: Goldplating, Precious metal recycle tank, Plating tank
7. Mixer - Powder Mixer: Chemical mixer
8. Dryer - Dry speedily with high pressure and high capacity: Anti-flogging, Air Renewing Recycle System

Company Background

Aotron is a professional factory that produces metal products and designs stamping tools. We have been established for more than 25 years. On clients side, we always insist that customers are first and we strictly control the quality. Not only do we provide the best quality products for our customers, but we have also earned a good reputation in the industry in Taiwan. We also have built a strong management system involving several specialized teams equipped to face any challenge.

Product Line

Aotron is a factory that designs and produces metal components. We have had a lot of experience in producing consumer electronics components, as well as many kinds of metal components. Our professional skills include designing stamping tools and producing stamping parts. We also design personalized metal components for our clients.

Company Background

Ju Xin Machinery Co. Ltd. , from its founding in 1982 till now, has been engaging in research, development, and manufacturing of material recycling equipment of high efficiency, low energy consumption, and low material consumption. Ju Xin Machinery manufactures all kinds of excellent compressing and bundling machines, provides a diverse selections targeting different types of recyclable materials, and provides customized services responding to different customer requirements.

Product Line

- Hydraulic system of high efficiency, low energy consumption, and low material consumption – high performance power unit can not only provide ample power but also save large quantity of energy consumption and maintenance costs for customers.
- Unique automatic bundling system – patent awarded by Taiwan government, is durable, simple in structure, and easy to clean and maintain.
- Micro-adjustable compressing chamber – can adjust compression density at will according to the characteristics of different materials and the preference of the user.
- Hydraulic cylinder holder – ensures a smooth and constant power output to prevent mechanical wear and extends the lifetime of the machine body.
- High strength cutter – upper and lower cutters made of special steel offer sharp and strong cutting and can reduce cutting resistance dramatically to reduce energy consumption.
- Extrusion head – equipped with heavy duty wheels on the four sides to withstand the torque generated when the compressed materials are cut off.
