

Investment opportunities in the agriculture and fishing sector in Algeria

1. The advantages of Algerian agriculture

- A wide diversity of agro-climatic environments
- Low usage of chemicals
- A large market (both local and a close proximity to foreign markets: the Mediterranean basin, African countries)
- Possibility to provide on the market all along the year, and also off season.
- A wide range of products
- High quality products, including organic products.

Algeria encourages foreign companies with the skills and knowledge required, to invest with local partners in strategic sectors in order to privileging concrete projects capable of quick results for a win-win situation.

It is appropriate to recall that foreign investment will be carried out in accordance with Article 58 of the Supplementary Finance Act of 2009, the foreign partner holds 49% of the share capital of the company created in partnership

New needs have been strongly expressed in the field in terms of investments both upstream and downstream of the production, in the packaging, recycling and processing of fruits, vegetables, meats, fishing products and aquaculture, and in the field of agricultural and aquacultural production.

2. Investments in upstream production

- Services (research, technical advice, and other services)
- Agricultural inputs (the production factors)
- Genetic material (plants production, seeds, breeding cattle, sheep and goats)
- Veterinary medicine
- Plant protection products (pesticides, herbicides, fungicides)
- Mechanization and agricultural equipment (planter, harvester, basic agricultural tools...)
- Irrigation development (water saving system): (sprinkler and drip systems, pivots, drip irrigation)
- The development of forage crops (alfalfa, corn and others...)
- Launch of multi-units greenhouses program
- The development of fertilization
- The enhancement of agricultural land (concession in irrigated perimeters)

- The development of integrated farms (dairy cattle, red meat, cereals, arboriculture)
- Ship repair (hull - machine)
- Manufacture of marine engines
- Fishing gear manufacturing (net-rope- cable, galvanized steel for fishing)
- Manufacture of plastic crates for fishery products (halieutics)
- Manufacture of fish food
- Manufacture of floating cages

3. Investment downstream production

- The export of sheep meat (realization of a network of slaughter houses in regulation with sanitary standards)
- The renovation and densification of cellars (wine processing)
- Installation of dairy units (processing and enhancements of milk)
- The crushing units Installation: (oilseeds)
- The development of distribution networks
- The commercialization of products
- Realization and enhancement of storage infrastructure and logistics for the storage of refrigerated and dry goods.
- The development of refrigerated transport
- Realization of storage silos

4. Investment in packaging, recycling and processing of fruits, vegetables and meats, products of fishing and aquaculture

- Valorisation of red meat and white meat production
- Valorisation of local products (dates, table olives, oil, figs, dessert grapes and wine grapes)
- The valuation of early agricultural products for export: Potatoes, tomatoes, zucchinis, peppers, chillies, onions, truffles, artichokes, grapes, dates...etc)
- The promotion and development of organic agricultural products
- Installation of oil mills
- Installation of confectionery plant
- Installation of bee farms
- Installation of potatoes processing units
- Installation of juice units
- Installation of Jam units (apricots, strawberries, figs, pears, apples.)
- Installation of poultry products processing units
- Installation of units for processing of skins and leather
- The materials and equipment (fruits, vegetables and meat conditioning)
- Transformation and conditioning of fishing and aquaculture products

5. Investment in production

- Cereals and dried vegetables
- Oilseeds
- Milk
- Red and white meat
- Early fruits and vegetables
- Date palm trees
- Woods yards
- Realization of marine and freshwater aquaculture farms
